EVENT 2017

## DESIGNED TO SAIL ABOVE THE WATER

The M32 is designed with forward buoyancy for the simple reason to prevent nose diving which only creates drag and just killing speed. The fact that water is 800 times more dense than air explain the importance of designing to minimize the drag of the wetted surface and waves. The M32 is built in state of the art carbonfibre, which makes it extremely stiff and lightweight.

With a total weight of just 500 kilograms, the M32 floats easily on the surface of the water instead of trying to penetrate the water. This makes a big difference when keeping the boat in the groove. Another feature on the M32 which increase the speed and makes it very manoeuvrable are the C-curved foils. They generate more and more lifting force the faster the M32 sails and therefore makes it possible to reach speeds above 30 kts.

## THE FUNDAMENTALS OF OUR CAMPAIGN

Professionalism, sportsmanship and ruthless determination, the key-stones of our campaign. We are team consisting of a world champion, an olympian and bigboat specialists. To success in the sport of sailing you need to be able to master a great mixture of fitness, knowledge, experience and talent. To increase our chances to success, our philosophy is to complement each other in the best possible way. Just as most successful teams, we put great effort into finding trustworthy harmony between everybody in the team in everything we do. With this philosophy and ruthless determination, we're aiming for the top on the world class arena.

We compete on the World Match Racing Tour and in the M32 Scandinavian series, two world class circuits for the M32 Class.

# AN EXPERIENCE OF A LIFETIME

To sail and race with the M32 catamaran is something very special. While racing it's a very demanding race-machine which needs 100 percent focus from the crew. Despite its extreme power it is a great platform for bringing guests on board, which makes it unique.

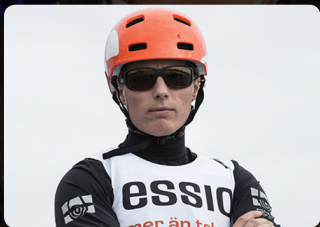

We are offering you, your employees or clients the chance to get a sensation of what it is like to sail a boat built for high speeds. The guests will sail the boat under surveillance from experienced team-members. With a maximum of four guests per ride, everybody will have the chance to experience all aspects of the demanding M32. We custommade every event depending on the request from the client. We are very flexible and sees challenges as possibilities to develop.

## WHAT TO EXPECT?

- A great memory for sailors as well as non sailors
- An unordinary team building event with a variety of physical demands
- On hand instructions by an experienced crew
- All equipment needed, including gloves and lifejackets
- Chaseboat with driver for pickups and drop-offs at the pier/ catamaran
- Aftersail gatherings for sharing of memories
